4K UHD video wall display with narrow bezel ranging from 1.8mm/3.5mm to Extreme Narrow Bezel of 0.9mm

Indoor & Out door LED Displays

- LED displays bring high resolution images to indoor applications where image quality matters; ranging from museums and other visitor attractions, broadcasting and control rooms, to retail and advertising.
- Outdoor LED displays are rugged, IP65 rated solutions that deliver high-resolution images with unequalled brightness and contrast levels. Available in various pixel pitches, they generate the perfect picture at all times, even in direct sunlight.

Commercial Digital Signage Displays

With best-in-class picture quality and exceptional durability, digital signage displays elevate the conventional viewing experience, helping businesses deliver content that engages, informs and entertains.

“Tell your business’ story through high-impact visual messaging. Our large format digital displays provide professional-grade image quality with superior contrast ratio and best-in-industry brightness and color uniformity”

DIGITAL SIGNAGE in Elevator

Interactive & Non Interactive Kiosk

An interactive kiosk is a computer terminal featuring specialized hardware and software that provides access to information and applications for communication, commerce, entertainment, or education. ... Integration of technology allows kiosks to perform a wide range of functions, evolving into self-service kiosks.

Outdoor-Weather proof Kiosk

The outdoor kiosk introduces a slew of variables including: water, humidity, cold, heat, sunlight, airborne particles, chemicals and other elements which produce corrosion. NEMA, IP65, UL standards come into play.

Unique Design Kiosks

Interactive Screens & Smart Boards

We can offer you the most advanced SMART Board with exclusive iQ technology and unrivalled collaborative features designed for any teaching or learning style.

Mirror TV

This special technology transforms the TV into a mirrored screen. When the screen is switched on, the images magically appear through the optical mirror TV glass, then when the display device is switched off the screen surface reverts back to a normal mirror

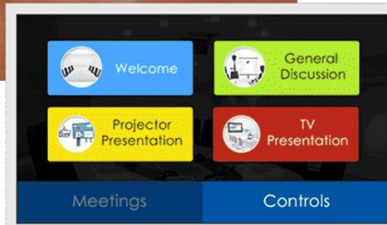

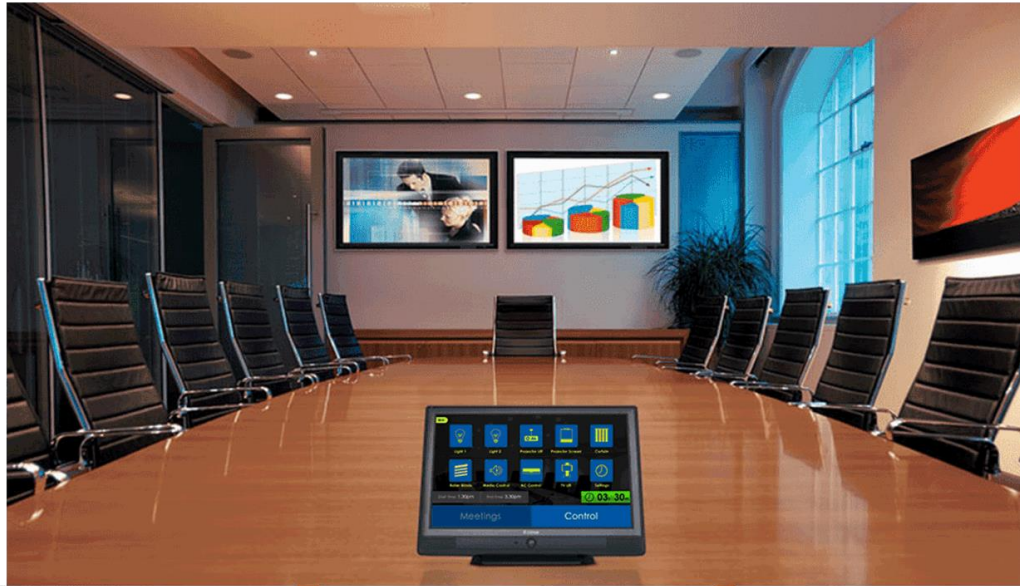

Transparent LCD & LED Displays

AV Control System

An A/V control system is the heart and brain of a collection of communication hardware and software that allows the operator to control each piece in tandem or individually.

Conference Room

Integrated with state of the art cameras, display, audio controls, our video conference solutions are built for ease of use, our AV conference rooms help organization of all sizes to improve their ability to communicate, share ideas.

We provide and support all the advanced tools of business communication with advanced yet simplified features such as control panels with one touch operation.

Holographic 3D

3D holograms are a completely new, innovative way of presenting products and impressively displaying their USPs to potential customers three-dimensionally. Unlike conventional forms of presentation, such as product films, customers gain a far more realistic, more detailed impression of the products being displayed.
